EDUCATION

Full Stack Web Development

Masai School

April 2022 - January 2023

Bachelor of Engineering (Civil Engineering)

Noorul Islam College Of Engineering

August 2014 - May 2018

TECHNICAL SKILLS

Debugging | MySQL | Spring Boot |
Java | RESTful APIs | MongoDB |
Jenkins | Termius

SOFT SKILLS

- Time Management
- Problem Solving
- Teamwork

INTERESTS

Music | Travel | Football

CERTIFICATES

Full Stack Web Development 
Masai School

Certification received as a part of completing 2160 hours of coding and practical learning in Java, data structures, algorithms, and soft skills.

PROFESSIONAL SUMMARY

Dynamic Java Backend Developer with a robust foundation in Java frameworks such as Spring and Hibernate. Renowned for strong problem-solving skills and seamless API integration. Fast learner with expertise in Generative AI, committed to leveraging emerging technologies for optimized performance, scalability, and security.

PROJECTS

1. Plant Nursery Management | |

Git | RESTful APIs | Java | SpringBoot | MySQL

- Developed and maintained APIs and functionalities for seed entity using Java and SpringBoot.
- Contributed to user and admin authentication and validation with session UUID for enhanced security.
- Collaborated within a team to design a REST API application, improving system architecture and performance.

WORK EXPERIENCE

Shopse

Java Backend Developer

August 2023 - August 2024

Job responsibilities:

- Developed and integrated lending flows for a consumer platform, enhancing EMI Transactions with leading Indian banks and NBFCs.
- Implemented secure communication microservices, optimizing external provider interaction in ShopSe's digital identity services.
- Enabled seamless authentication and authorization on the platform through robust API development and integration.

Paypal via Aditi Tech Consulting

Java Backend Developer

September 2024 - February 2025

Job responsibilities:

- Collaborated successfully with a cross-functional CostEngine team to calculate card transaction costs, aligning with the job's collaborative requirement.
- Developed and executed functional tests to ensure transaction accuracy, demonstrating proficiency in conducting thorough testing and debugging.
- Streamlined data handling processes by automating JSON file generation using Python scripts, showcasing problem-solving skills.
